

OMER FAROOQ

o4farooq@uwaterloo.ca | [LinkedIn](#) | [Portfolio](#)

EDUCATION

University of Waterloo

Expected: Apr 2028

Candidate for BAsC in Mechanical Engineering, Specialization in Mechatronics

Waterloo, ON

- **Honors:** President's Scholarship of Distinction (\$5,000)
- **Relevant Coursework:** Dynamics II, Thermodynamics I, Materials II, Electromechanical Devices II

EXPERIENCE

Mechanical Design Engineering Intern

Jan 2026 – Apr 2026

Owen's Corning

Toronto, ON

- Incoming for Winter 2026, expected to support mechanical design projects by designing various components, producing detailed CAD models, and assisting engineering with **Root Cause Analysis**, **PFMEA**, and production improvements

Mechanical Design Engineering Lead

Sept 2025 – Dec 2025

Electrium Mobility

Waterloo, ON

- Designed and assembled a **12S2P 24-cell** lithium-ion battery pack with an integrated **BMS (Battery Management System)** and nickel strip interconnects, delivering **50.4V** peak voltage and safe current handling for high performance
- Modeled and **3D printed** the custom battery enclosure in SolidWorks using heat-resistant **PETG**, integrating **Thermal Analysis** and thermocouples to verify heat dissipation, minimizing thermal gradients during sustained load cycles
- Conducted thermal stress testing and enclosure validation, achieving **100%** stability under continuous **20A** discharge with zero thermal-runaway incidents across **25+** charge-discharge cycles

Manufacturing Engineering Intern

May 2025 – Aug 2025

ALMAG Aluminum

Brampton, ON

- Optimized part placement and equipment layout for **Tesla's automotive project**, contributing to a **\$77M** manufacturing program focused on **lean production**, ergonomic flow, and scalable automation
- Developed and proposed **Kaizen-driven** factory layout redesign, projected to boost efficiency by **45%**, unlock **38 days** extra production per year, and delivers **\$4.5M** in annual savings through lean flow and 5S practices
- Produced AutoCAD layouts for two facilities totaling **140,000 sq ft** and used them to design a **FIFO** flow for **70,000** parts, support **Value Stream Mapping**, and reduce internal travel distance by **37%** to boost part flow and efficiency
- Designed a CNC fixture in **SolidWorks** applying **GD&T** and tolerance stack-up analysis, minimizing setup time

Management Engineering Intern

Sept 2024 – Dec 2024

Vision Extrusions Group

Toronto, ON

- Integrated a online database for **5,400+** dies, enabling **Just-in-Time** access and improving retrieval efficiency by **72%**
- Performed **FEA** in **ANSYS Workbench** to optimize performance, enabling clamps to support **45 kilograms**
- Engineered an ultra-lightweight PVC-aluminum prototype window frame (**<2.3 kg**) using **DFM/A** in AutoCAD

Mechanical Design Engineering Intern

Jan 2024 – Apr 2024

Vision Extrusions Group

Toronto, ON

- Engineered **8+ GD&T-based** window-profiles in **CATIA V5** and AutoCAD, integrating **DFM** practices
- Used **Root Cause Failure Analysis** to enhance waterproofing by **22%**, ensuring an airtight seal against wind and rain
- Achieved a **64%** increase in Moment of Inertia of a frame through material analysis and cross-sectional optimization
- Applied **DFA** principles in AutoCAD to redesign window profiles for easier assembly and accuracy during fabrication

PROJECTS

PianoBot | SolidWorks, AutoCAD, 3D Printing, C++

Summer 2024

- Designed and programmed a **piano-playing robot** with accurate 3-axis movement, **3D-printed** parts, an ultrasonic sensor, and a color sensor to read color-coded sheet music, achieving an **92%** accuracy while playing **70** notes

Spin N' Shoot | SolidWorks, 3D Printing, Laser Cutting, Arduino

Fall 2023

- Designed and built a motorized toy with a **custom gear system**, slip-ring cable management, and laser-cut/3D-printed parts; integrated **Arduino** motor control and impact sensors to detect Nerf bullet hits and rotate 5 targets dynamically

SKILLS

Tools: SolidWorks, AutoCAD, ANSYS Workbench, CATIA V5, 3D Printing, Laser Cutting, CNC Machining

Design & Manufacturing: FEA, GD&T, RCFA, DFM/A, PFMEA, 5S, Kaizen, Lean Six Sigma, Value Stream Mapping

Programming Languages: C++, JavaScript, HTML5, SCSS, MATLAB
